“Leading Global Manufacturer & Supplier of Premium Modular Flat Pack Cabin Units”

Our modular flat pack cabin units stand at the forefront of innovation, quality, and reliability. As one of the leading manufacturers and suppliers in the Middle East and in many countries around the world, we proudly deliver modern, durable, and cost-efficient space solutions for residential, commercial, industrial, and remote site applications. Engineered with advanced technology and international standards, our flat pack cabins offer quick installation, superior structural performance, and flexible customization to meet diverse project needs. From workforce accommodations and office units to storage rooms, clinics, kitchens, and multi-purpose facilities, our products are trusted by major companies, contractors, and government sectors across continents. With a strong supply network, competitive pricing, and proven experience in large-scale deployments, we continue to support global clients with reliable products and unmatched customer service.

"أحد رُوّاد العالم في تصنيع وتوريد الوحدات السكنية الجاهزة من نوع الفللات باك"

الابتكار (Flat Pack Cabins) تُعدّ وحداتنا السكنية الفجائية والجودة والاعتمادية. فبصفتنا أحد أبرز المصنّعين والمورّدين في الشرق الأوسط وفي العديد من دول العالم، نفخر بتقديم حلول مساحية حديثة، متينة، وفعّالة من حيث التكلفة لتلبية احتياجات المشاريع السكنية والتجارية والصناعية ومواقع العمل البعيدة. تم تصنيع وحداتنا وفق أحدث التقنيات والمعايير الدولية، مما يوفر سرعة في التركيب، وكفاءة عالية في الهيكل، وخيارات مرنة للتخصيص بحسب متطلبات كل مشروع. ومن الوحدات السكنية ومكاتب العمل إلى غرف التخزين والعيادات والمطابخ والمرافق متعددة الاستخدام، أصبحت منتجاتنا خياراً موثقاً للأكبر الشركات والمقاولين والجهات الحكومية حول العالم. وبفضل شبكة التوريد القوية والأسعار التنافسية والخبرة الواسعة في تنفيذ المشاريع الكبرى، نواصل دعم عملائنا حول العالم بمنتجات موثوقة وخدمة عملاء متميّزة لالا مثيل لها.

1. Reduction of Heat Loss for Fuel saving: High Density Rock Wool; 100 consistency and prevents heat bridges during the complete life span. For an average housing or office floor, installing insulation in ceiling, underfloor and wall insulation + double-glazing can reduce 80%

2. Comfort & Fire Hazard Protection: The reduction in heat movement results in that is **warm in the winter and cool in the summer**. Insulation also provides a drier environment. Condensation occurs on the inside surface of a roof or ceiling at any time when the temperature of the dew-point of the air in contact with it. Insulation raises the temperature on the insulated surface above thus inhibiting condensation. Insulation can also help reduce mold growing on the inside of your wall having high temperature and fire resistance

3. Reduced Noise Levels: Insulation is an excellent **sound absorber**. It works by forcing it to bounce off the millions of fibers the insulation is made up of. Every disruption to the sound energy and the sound becomes quieter. Good insulation will reduce the noise entering your house (the noise created within your house (TV, stereo,)) making your home or office a quieter place.

4. Saving on Energy Costs & Helping the Environment: Made of **natural & nearly 100% recyclable** contributing to environmental protection. Insulating can cut the cost of this by 40 % depending on such factors as climate, type and size of home/office. Even if you insulate just your 30% on heating and cooling bills. This is because heating and air conditioning units don't have to run at the desired temperature in the building. Less energy spent heating and cooling home means less energy stations that burn fossil fuels to produce electricity. Coal fired generators are one of the biggest contributors and are responsible for generating one fifth of a country's total greenhouse gas emissions.

5. Cost effective and Durable: Cost effective and durable with over 15 year's life span. It is disassembled minimum of 3 times and can therefore be used on many consecutive projects over a long period. **easy to assemble** as steel structure is designed for easy handling and linking. It also includes rainwater pillars. Reusable, mobile & resilient offering the customer a sustainable solution through an advanced construction.

Benefits of Prefabricated Modular Units

Prefabricated Modular Units

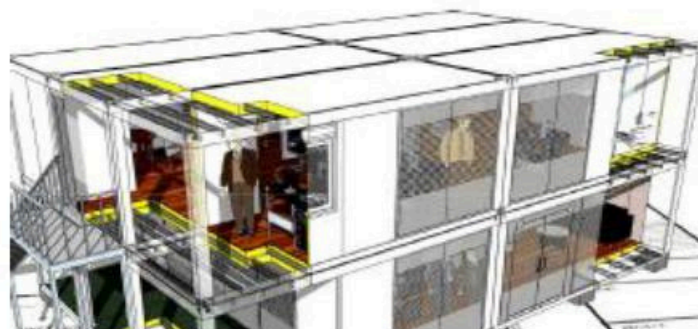

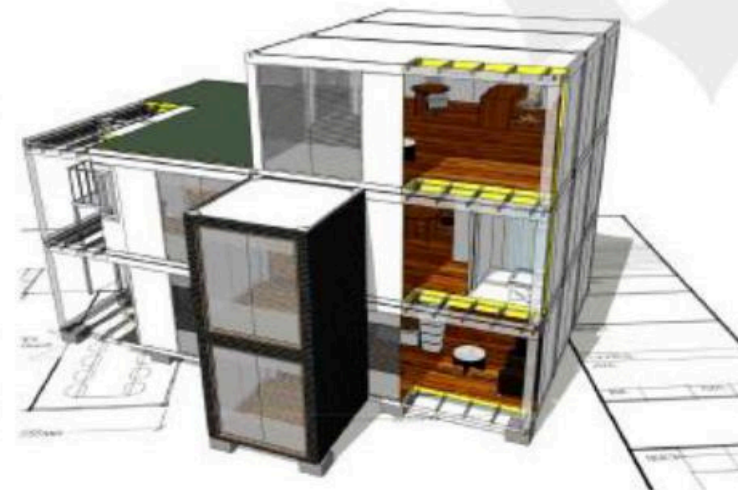

• Fire Hazard Protection • Noise Level Reduction • Energy Saving & Sustainable
